

Social Innovation Workshop

Wednesday 19 November
ENLIT, Room 05.08 + 05.09

10:00-12:00

Not just Technology: The Human Side of Innovation Success

This interactive workshop brings together five EU projects to show how social innovation, communication, and citizen engagement turn complex solutions into meaningful change. Expect stories, surprises, and a hands-on challenge designed to rethink how we connect technology to society.

Wednesday 19 November
ENLIT, Room 05.08 + 05.09

13:00-15:00

Technical Innovation Workshop

Making Building Data Work: Tools, Solutions & Outcomes from the CHRONICLE Project

How can building professionals leverage new and existing data sources in scalable data infrastructures to deliver stakeholder value and drive efficiency and renovation actions? Hear building technology experts speak about the opportunities created by the EU-funded CHRONICLE project.

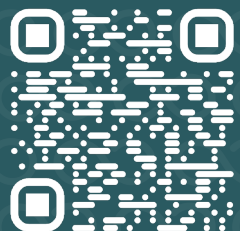

CHRONICLE

The CHRONICLE project has developed digital solutions for building sector professionals to meet sustainability targets, while ensuring adequate comfort for residents.

The set of tools serves to optimise building performance, to monitor energy consumption and to develop more cost-effective, long-term maintenance and renovation plans.

Discover our cutting-edge innovations to support you to take the next step towards sustainability in construction!
